Alec Youngblut

Full Stack Developer

Professional Summary

Enthusiastic software developer who is eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Highly motivated to learn, grow and excel with my skills as a full stack developer, both independently and collaboratively.

Work History

2021-02 – 2023-02

Software Developer

Clarendon Technologies, London, Ontario

- Worked both independently and collaboratively to design, build and maintain web-based software solutions tailored to clients needs
- Participated in client meetings to collectively create solutions to be presented in a timely and efficient manner while satisfying client concerns
- Developed code for internal and external use across several different sectors such as industrial agriculture, professional development, as well as transportation and hospitality.

2019-01 - 2020-08

Jr. Full Stack Developer

Docket Manager, London, Ontario

- Participated in planning and development of a Software as a Service (SaaS) product while utilizing agile methodologies and practices
- Demonstrated ability to understand and modify existing solutions in a non-disruptive manner when investigating and resolving customer bugs
- Enhanced product wide permission-based access and definition setting
